Dear Ted:

Would it be too much to ask to be kept up to date on your reprints? I am getting down to a revision of my discussion— I particularly wanted your 1953 paper in JNCI following Barrett and Derringer, but (as usual) it is out of the library, being bound. If you can't afford to part with the last of your supply, I'll be grateful for a loan.

Needless to say, the meeting was a great success, certainly from the point of view of informing an ignorant onlooker.

Yours sincerely,

P.S. I do already have copies of the following:
